

## How to get a Tridium Niagara Host ID

Niagara 4 Supervisor (Browser based and WorkBench) require host ID for license activation. You will also need a host ID for any extended SMA etc. Niagara Host ID is a unique identifier and is tied to the computer where you have Niagara installed.

You must already know your host ID but if you don't or if you're new to Niagara, below are links to download Niagara 4 Supervisor software for Linux and Windows that you can install and get a host ID. Once downloaded and installed, please generate a host ID (typically you would see host ID on the last screen of your installation) and come back to Dihuni.com to purchase Supervisor and Workbench licenses for software activation. (not required for JACE or IO Module or Edge Controller VEC-10 purchase).

Downloading the software:

You must first download Niagara Supervisor software for free using the following links and depending on your operating system:

Niagara Supervisor for Windows Niagara Supervisor for Linux

Installing the software:

Locate the downloaded zip file and right-click. Choose extract all. Once extracted, locate Installer\_x64.exe and double-click to install. (if you do not have a x64 operating system, use the x86 version.)

You may be asked to establish a system passphrase. Use Niagara4Rocks to keep it simple.

Choose (at least) to add Start menu shortcuts and then select next.
